Challenge 1: Creating a Digital Portfolio

Purpose: Students will create and use a digital portfolio to document their learning, display artifacts, and reflect on challenges to show their problem solving journey over time.

Challenge Involved:

- Creating a website using google sites
- Naming the website
- Creating and naming additional pages on the site
- Customizing the website
- Sharing the website with teachers
- Adding text boxes to write descriptions and reflections
- Inserting images from google drive onto the website
- Bookmarking the website to locate it more easily
- Navigating the website from the homepage to additional pages
- Learning how to take pictures and videos using an iPad
- Creating a folder to store pictures and other artifacts to be posted on the website
- Logging in and out of google drive on an iPad
